It is with great pleasure that I recommend GeoFocus 2000 Construction Services for your construction project.

Acting in my capacity as the Honourable Secretary of the Islamic Shia Ithn asheri Jamaat of Toronto (ISIJ) I had the pleasure of working with Roger Altobelli in his capacity as the Senior Construction Manager for the construction of the \$16,000,000.00 Jaffari Community Centre located at 9000 Bathurst Street in Vaughan, Ontario.

Est. Aug. 1974

Razavi Islamic Centre

Roger was instrumental in directing the assessment of a project that had been left dormant for almost 30 years and especially in assisting me to educate myself to position our community to restart the construction of our state of the art 165,000 square foot Mosque, community centre, school and world class library and research centre.

I have known Roger for approximately 4 years both professionally and as personal friend; in that time I have found Roger to be a dynamic and capable individual in the field of construction and site management. Roger is an individual whom in addition to being personable, well-liked and respected by all of trade contractors whom he comes into contact with, is also extremely knowledgeable in the field of construction law, Occupational Health and Safety and construction technical requirements. Roger is extremely capable in interpreting design drawings and specifications. More importantly, he is extremely capable of instructing trade contractors and suppliers and advising same on appropriate action to take.

Ahlul Bayt Islamic Centre

Roger presents himself as an articulate, self-assured and determined individual. In my opinion, he is responsible, intelligent, honest, dedicated and very hard working. The fact that he has established his firm and himself as a successful Construction Manager is a testament to his character and determination. Roger has always managed to overcome obstacles with a focused approach, which makes him an ideal candidate for the arduous task of looking after construction project and its inherent problems.

In addition to those qualities already mentioned, it has been a pleasure to have Roger act as my eyes and ears on our project. Roger has an aptitude for dealing with people and for maintaining his sanity and humour, even at the worst of times.

Roger has afforded me the ability and opportunity to assess his potential and reliability. I feel that Roger's abilities are clearly exemplified by his keen awareness and performance in the construction environment.

In short, I have no hesitation in highly recommending GeoFocus 2000/Roger to you. It is my belief that he has the management skills and personal qualities to successfully manage and supervise any project that he undertakes. Roger does not understand the concept "can't be done", he offers only logical well thought out solutions, not additional problems.

Should you have any questions, or require any further information concerning John, please do not hesitate to contact me.

Yours Truly,   
Mohamed Arif Asaria  
Hon. Secretary
